EXPERIENCE

Bedore's Photo Graphic Arts Inc.

Sept 2025 – Present

Web Developer & Data Integration Specialist

- Developed and customized an e-commerce website from an existing Shopify theme using Liquid, JavaScript, HTML, and CSS, creating custom sections, reusable components, responsive layouts, and interactive functionality.
- Designed and implemented custom storefront filtering and navigation using Shopify collections, tags, menus, and catalog taxonomy.
- Built and optimized a centralized catalog data structure for multiple departments, standardizing inventory for product management, search, and filtering.
- Developed a suite of Node.js tools for XLSX/CSV import and export, data validation and transformation, inventory synchronization, and Shopify-compatible data generation.
- Implemented on-page and technical SEO improvements across the storefront to support search visibility and indexing.
- Developed responsive websites for multiple Bedore's businesses using Yola as the underlying platform, with most front-end layout and functionality built in custom HTML, CSS, and JavaScript.
- Maintained and enhanced the websites through new feature development, code updates, troubleshooting, and production publishing.
- Authored comprehensive technical documentation for custom Shopify functionality, data-processing tools, and catalog management workflows.

RP Shield

Jul 2025 – Aug 2025

Web Developer (Contract)

- Designed, developed, and launched a responsive business website from client requirements using HTML, CSS, and JavaScript.
- Built mobile-focused layouts and sticky navigation with active-section highlighting and scroll-aware controls.
- Implemented technical SEO in the site code with page metadata, crawl and index directives, and Open Graph tags for social previews.
- Deploy and maintain production updates through a Git and GitHub workflow.

Studio Vent d'Est Digital Media

May 2025 – Jun 2025

Database Developer Intern

- Designed and optimized a relational MySQL schema, defining tables, keys, relationships, and constraints for a web application.
- Developed stored procedures for API-facing operations and refined queries to improve database performance.
- Collaborated with back-end developers to align database logic with REST API requirements.

uTest

Oct 2020 – Feb 2021

Freelance Software Tester

- Performed functional and smoke testing across web and mobile applications.
- Documented reproducible defects with environment details, steps, expected and actual results, and supporting evidence; verified fixes with development teams.

TestIT Software

Dec 2020 – Feb 2021

Tester Intern

- Executed functional and regression tests, wrote structured test cases from requirements.
- Reported defects with reproducible steps and clearly documented expected and actual results.

Moscow Center of Urban Planning

Jun 2011 – Apr 2021

Urban Planning Specialist

- Analyzed land-use and construction data, maintained project documentation, and prepared reports for planning decisions.

Moscow City Property Department

Jan 2006 – Jun 2011

Contract Specialist

- Managed construction contracts and project documentation, coordinating with stakeholders to resolve delivery issues.

SKILLS

Languages: C#, JavaScript, Java, PHP, Dart, SQL

Back-End & APIs: .NET, ASP.NET, REST API Integration, Node.js, Express, Spring Boot

Databases & Data Processing: SQL Server, MySQL, Database Design, Data Modeling, SheetJS (XLSX)

Front-End & Mobile: HTML, CSS, React, Angular, Bootstrap, Flutter, Liquid, Responsive Web Design

Additional Skills: Search Engine Optimization (SEO), Software Testing & QA, Technical Documentation, Troubleshooting, Problem Solving, Teamwork

TOOLS

Development Tools: Git, GitHub, VS Code, Visual Studio, IntelliJ IDEA, Android Studio, WebStorm, SSMS

Design & Modeling: Figma, Visual Paradigm

PROJECTS

HR Management System - Capstone Project | C#, ADO.NET, .NET, SQL Server, Flutter, GitHub

Built an HR system with employee search and a role-based login system (CRUD operations, different user access levels). Created a C# .NET REST API to serve both a web client and a Flutter mobile app.

RP Shield - Business Website | HTML, CSS, JavaScript, GitHub

Developed and deployed a responsive business website from scratch using HTML, CSS, and JavaScript, with custom navigation, forms, interactive functionality, technical SEO, and ongoing maintenance. [rpshield.ca](#)

Binary Cat - Mobile Application | Flutter, Dart, Figma, GitHub

Developed a Flutter Android application for binary arithmetic and binary-to-decimal conversion. Designed the interface in Figma and managed testing, Google Play publishing, and maintenance updates. [Google Play](#)

Motion Designer Portfolio - Web Application | React, JavaScript, GitHub, DigitalOcean

Developed and deployed a React portfolio web application for presenting motion design and VFX work, with an admin panel for managing projects. [akialex.com](#)

Golf Course Management - Inventory Web Application | Angular, Node.js, REST API, MySQL

Designed the MySQL database layer for an Angular and Node.js management application. Implemented the data model supporting authentication and CRUD operations and integrated it with the REST API.

IvaCrystals - Business Website | HTML, CSS, JavaScript

Developed and deployed a responsive jewellery website from scratch using HTML, CSS, and JavaScript. Created product galleries linked to individual Etsy listings and optimized the presentation for desktop and mobile devices. [ivamage.com](#)
